*With the compliments of*

*Dr. B. A. Saletore,*

*M A., Ph. D. (London), D. Phil. (Giessen)*

*Director of Archives*

*Government of India*

### **National Archives Building, New Delhi**

The archives of the Government of India are preserved in this solid red stone building. It is one of the biggest records repositories in Asia.

### **Air-Cleaning**

As soon as records are received in the Department for preservation, they are first air-cleaned with the help of the electric air-cleaning machine.

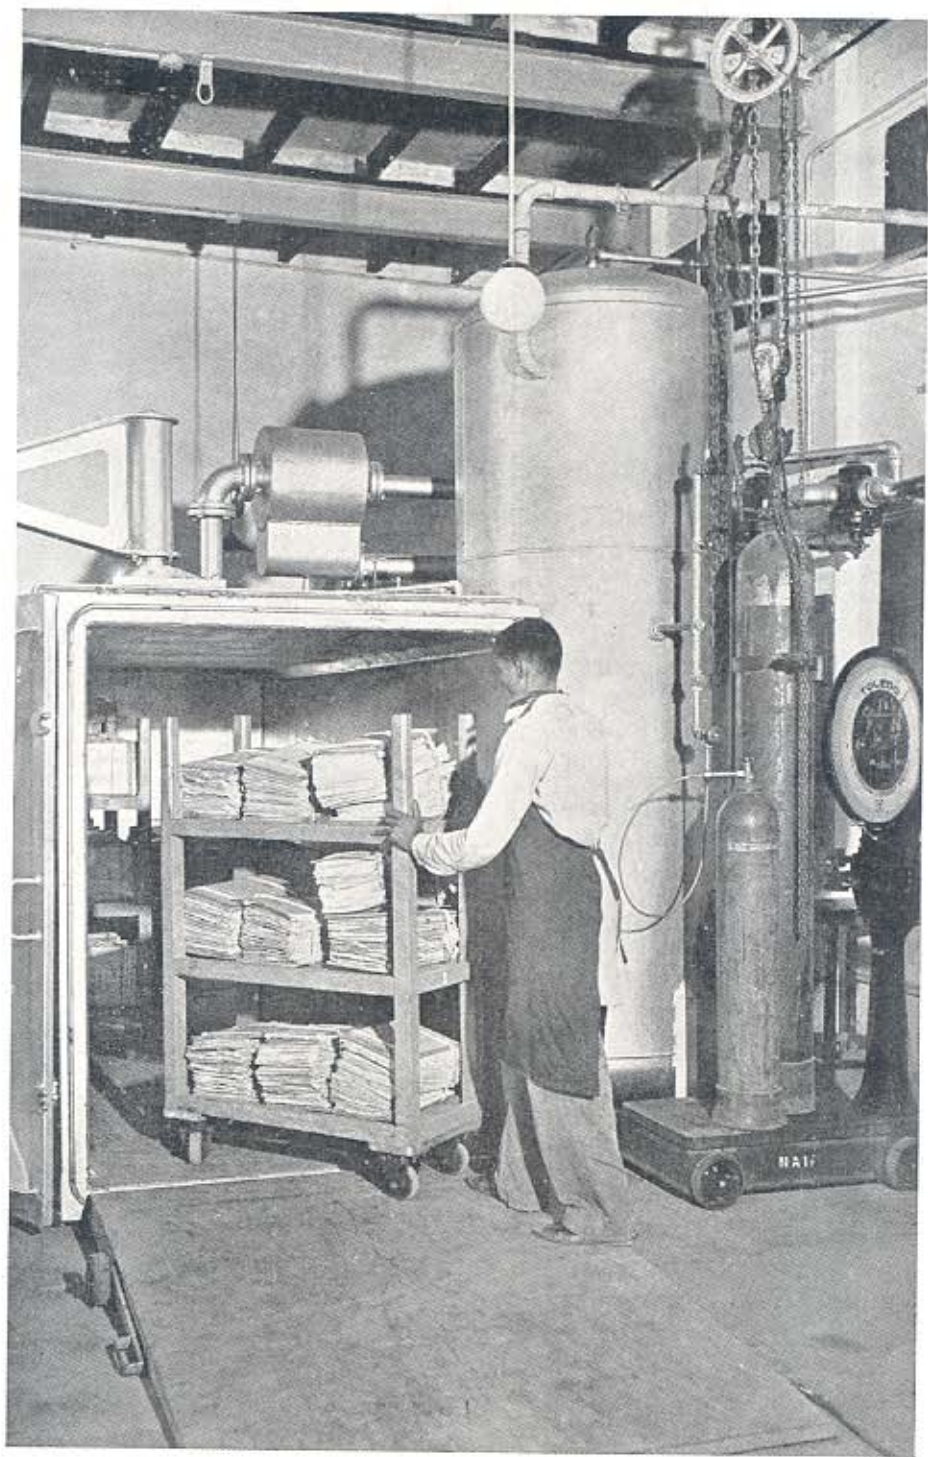

Air-cleaning Equipment

### **Vacuum Fumigation**

After air-cleaning, the records are fumigated in this Vacuum Fumigation Chamber which has a capacity of 300 cubic feet.

Vacuum Fumigation Chamber

### **Stack Areas**

After air-cleaning and fumigation, the records are ready for preservation in the muniment rooms. In the stacks the records are being regularly looked after by a qualified staff. The stack areas, which comprise three floors, are equipped with modern fire-fighting equipment.

### **Rehabilitation (Manual)**

Hundreds and thousands of records require immediate repair as soon as they are received in the Department. A fully trained staff performs this difficult task with diligence and skill.

Manual Repair of Records

### **Rehabilitation (Mechanical)**

Due to the very large bulk of records requiring rehabilitation, the Department has also adopted the latest process of lamination of records. A hydraulic laminating machine was put into operation in February 1956. It is capable of laminating 1,500 foolscap sheets per day.

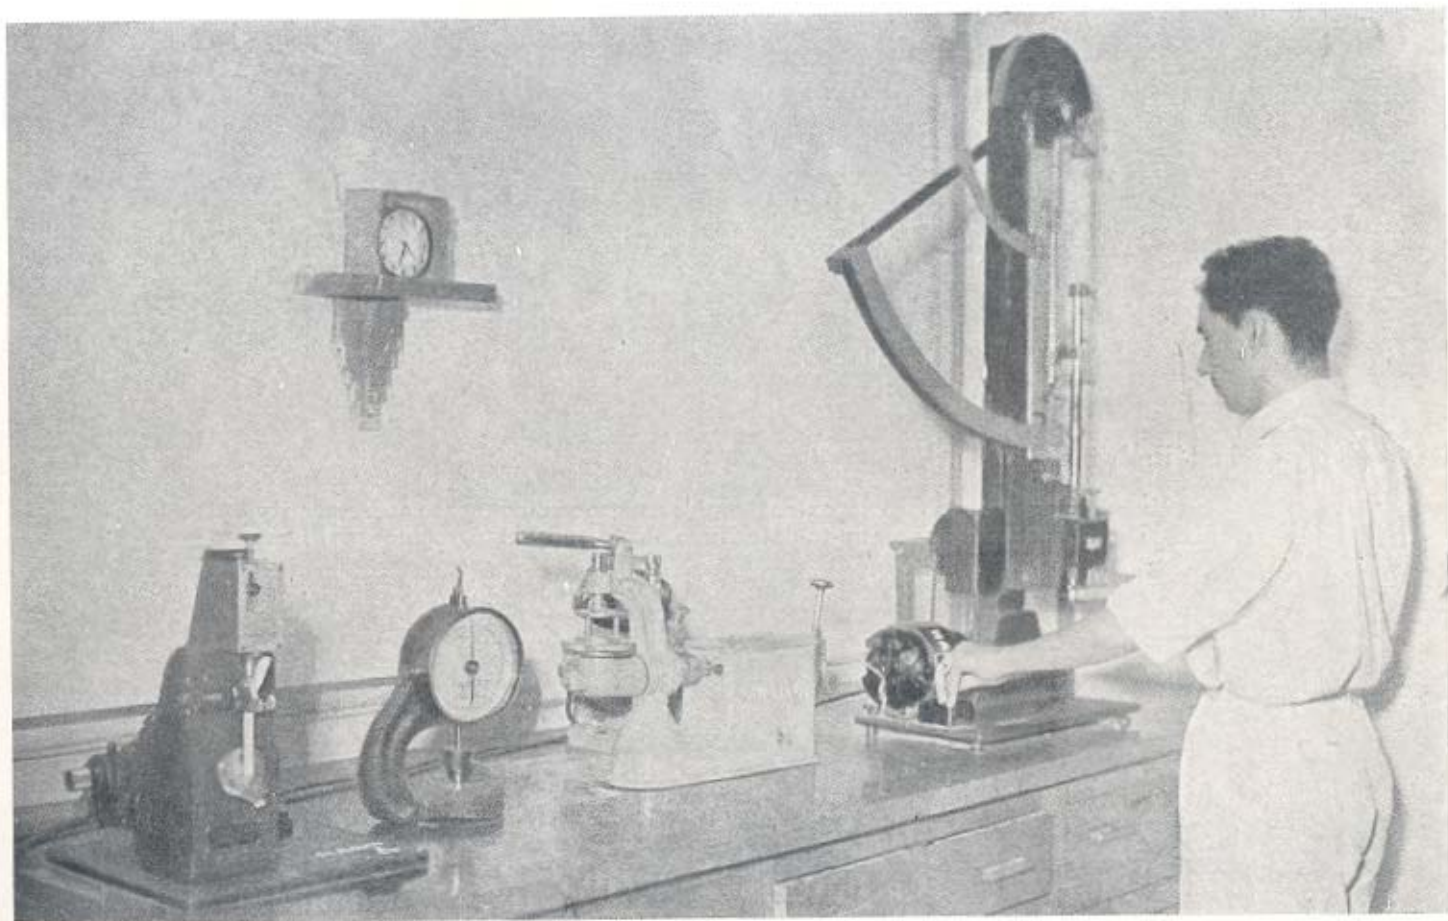

Hydraulic Laminating Machine

### **Research Laboratory**

An up-to-date Research Laboratory has been set up in the Department in order to conduct experiments on the various problems of archives preservation. This is the only Archives Research Laboratory in the country.

Research Laboratory (Paper Testing Section)

### **Microfilming**

Microfilming solves to some extent problems concerning space and security of records. The Department has an up-to-date Microfilming and Photographic Division.

Microfilming Unit

### **Research Room**

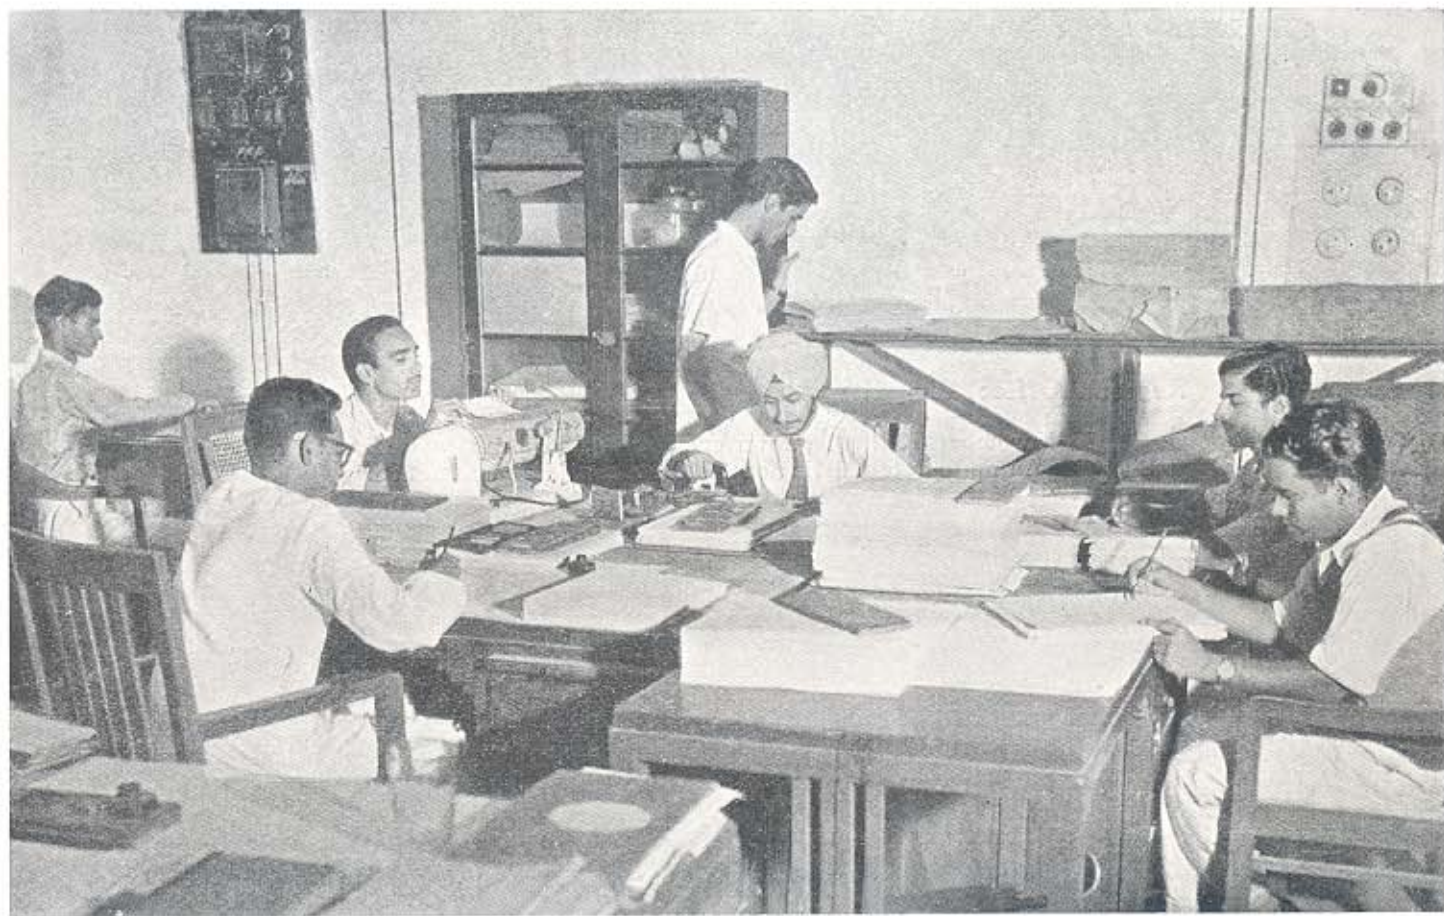

Besides being indispensable aids to administration, records are also the most valuable source-materials of history. This Department provides necessary facilities for research among its records.

### **Training in Archives Preservation**

National Archives is one of the few centres in the world where regular training in archives-preservation is imparted to the employees of Central and State Governments in a three months course held twice a year and to those having a post-graduate degree in modern Indian history in a year's diploma course.

Practical Training in Archives Preservation

### **Regional Office, Bhopal**

In November 1954, the Government of India opened a Regional Archives Office at Bhopal. An up-to-date building of this Office is under construction.
